**Knowledge Portal**

## **Integrate Knowledge, Compliance Management and Business Improvement in a Single System**

Today, technology trends and customer preferences dictate that compliance management and business improvement software is much more than a mechanism to meet ISO and regulatory requirements. It must be an integrated part of the overall compliance management and business improvement system that generates real benefits and return-of-investment. QSET Consensia Knowledge Portal integrates QSET Consensia Action Management, Audit Management, Document Management and Reporting modules, the leading compliance management and business improvement applications. QSET Consensia Knowledge Portal provides efficient access and collaboration for your organizations compliance management and business improvement strategies.

### **QSET Consensia Knowledge Portal:**

#### **> Facilitate Communication**

The QSET Consensia Knowledge portal provides further integration of the QSET Consensia modules enabling stronger communication between the different users and processes from the customers through to the supply chain partners. You make faster decisions working with easy access to knowledge and reports. The combination of information and interpretation creates knowledge to help you understand what is happening, decide what to do about it and take action.

#### **> Provides Common Access**

One centralized point of access for users providing an integrated system through one global point using a web browser or Lotus Notes client. One central access point to determine and complete assigned tasks across the different QSET Consensia modules and beyond.

#### **> Extend Compliance Management and Business Improvement Enterprise-Wide**

QSET Consensia Knowledge Portal sets compliance management and business improvement as a priority by providing an integrated approach to knowledge and data within the QSET Consensia modules. As users and managers become familiar with the QSET Consensia modules and the QSET Consensia Knowledge Portal, compliance and business improvement can be easily extended to all business areas like accounting, human resources, marketing and sales.

#### **> Accelerates ROI**

The individual QSET Consensia modules offer a high return on investment, By using QSET Consensia Knowledge Portal you will extend the access to these modules and the information gathered, significantly accelerating this ROI. By providing single point of access, companies can significantly reduce total cost of ownership and boost productivity.

#### **> Integrates**

QSET Consensia Knowledge Portal integrated approach allows management to view all the information relating to compliance and business improvement processes currently in progress without wasting time accessing and monitoring multiple systems. Integrating the individual QSET Consensia modules into a complete compliance management system enables further interaction and communication between users and the individual modules. The seamless integration provided by QSET Consensia Knowledge Portal provides common system administration through one data portal, including security , regulatory and quality standard compliance and reporting for trend and data analysis.

The screenshot shows a web browser window displaying the QSET Consensia Knowledge Portal. The page title is "QSET Consensia Knowledge Portal". Below the title, there is a "Corrective Action Search" section. The search form includes several fields and dropdown menus:

- Enter Summary?: LATE DELIVERY

## Knowledge Portal

### Features

#### > Link Pages

Easily set-up your own intranet pages with rich content and links to other parts of the organizations management systems. Set-up bulletin boards and newsletters keeping users up-to-date on current and new compliance and business improvements activities. The options are endless with this functionality.

#### > Searching

Set-up multiple search forms for searching single or multiple databases. Define your own search parameters, what databases to search (including non-QSET Consensia Domino databases) and what documents or subset of documents to include in the search. Search using specific document fields. Set-up and search company specific metadata. Users are presented with the search results and a link directly to the documents found.

#### > My Favorites

Users can automatically include links to documents in their favorites list. This saves valuable time and effort trying to find policies, procedures, instructions, audits, actions or any other day-to-day documents that you need to access and refer to on a regular basis.

#### > Task List

List current tasks that you have been assigned. Search specific modules or all databases for list of outstanding tasks.

#### > Configure and View of Reports

All reports can be configured and viewed through the QSET Consensia Knowledge Portal.

#### > Links to Databases/Websites

Link to all QSET Consensia modules or non-QSET Domino databases directly from the QSET Consensia Knowledge Portal. You can also set-up links to websites.

#### > Powerful Security

Access to individual Link Pages, Search Forms, Reports can be limited to individuals, groups of users or functions. This allows a common access point enterprise-wide but allows different information, searches and reports to be presented to different groups of users throughout the enterprise.

#### > Single Logon

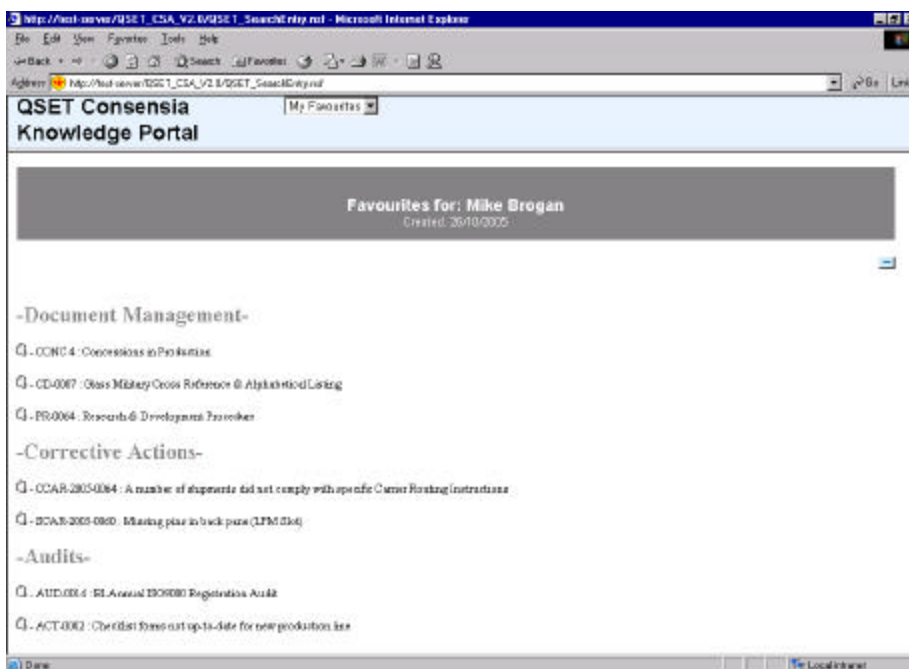

Users only need to logon to the QSET Consensia Knowledge Portal for access to other QSET Consensia modules and non-QSET databases.

#### > Platform Independent

QSET Consensia Knowledge Portal is fully web enabled and can be accessed through web browser or Lotus Notes client.

#### > Integration

QSET Consensia Knowledge Portal can be easily integrated with other management system databases allowing you to add links and search both QSET Consensia and non-QSET Consensia modules. The QSET Consensia knowledge Portal can be easily integrated into a corporate intranet website to give compliance management and business improvement the priority and profile it requires within any successful organization.
